To Whom It May Concern

RE: JAMES WELLER OF WELLER CONSTRUCTION

I have known Jim since February of 1997. He was solely responsible for the successful completion of my Radiation Oncology center in record time. His honesty, integrity and qualifications in all aspects of building a center such as ours are without exception meritorious. On many occasions, his tenacity and hard work turned potential disasters, created by others, into great successes. He built a very high quality facility in a highly cost effective and efficacious manner. His knowledge of the building trades is first rate. However, most of all, his honesty and integrity stand out as being highly unique. I truly feel that his client's interests come before his own.

I therefore recommend Jim as someone who can be relied upon to complete the job with excellence and to stand behind his work. I can not emphasize enough his ability to rapidly and cost effectively accomplish the tasks assigned to him. I would trust him in any circumstance.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Harvey Gilbert', written in black ink.
